PROFESSIONAL SUMMARY

Motivated Computer Science Engineering student and aspiring Full Stack Developer with hands-on experience in MERN stack development. Proficient in JavaScript, React.js, and MongoDB, with experience building and deploying real-time web applications. Possesses strong problem-solving skills and a solid understanding of modern web development practices. Eager to apply technical knowledge in a professional environment, continuously learn, and contribute to impactful projects while exploring emerging areas such as Generative AI and Cloud Computing.

TECHNICAL SKILLS

RAG

GEN AI

React

Java script

MongoDB

Mongoose

Wagtail

Node.js

Express

Docker

PROFESSIONAL EXPERIENCE

Developer-internship 2026 - Present

CortexCraft.AI

- Worked as a Full Stack Developer Intern, contributing to real-time web application development using modern web technologies. Developed and implemented Generative AI-based solutions, including a Retrieval-Augmented Generation (RAG) application and chatbot. Collaborated with team members and fellow interns on live projects, gaining hands-on experience across the full development lifecycle. Strengthened practical knowledge in full stack development while integrating AI-driven features into scalable applications.

KEY PROJECTS

RAG chatbot Application

Developed a document-based chatbot using Retrieval-Augmented Generation (RAG) for context-aware interaction with PDF and TXT files. Built a Streamlit interface and implemented semantic search using ChromaDB. Integrated Groq LLMs via LangChain for fast, accurate responses with source citations, and designed the end-to-end pipeline including document processing, embeddings, and retrieval.

Business process management(ongoing)

Developed a scalable full-stack application using React, Node.js, and MongoDB to streamline business workflows and document management. Implemented secure JWT-based authentication with password encryption and email-based password reset. Built RESTful APIs and integrated multi-format document processing (PDF, Excel, Word) with AI-powered data extraction using Groq SDK. Designed a responsive UI with Material-UI and optimized data handling.

Containerized the application using Docker Compose for efficient, scalable deployment.

Real Time Chat Application

Developed a full-stack real-time chat application using MongoDB, Express.js, React, and Node.js with Socket.io for instant messaging. Implemented secure JWT-based authentication with bcrypt and user profile management with image uploads via Cloudinary. Designed a responsive UI using Tailwind CSS and integrated real-time notifications for enhanced user experience.

 EDUCATION

Atria Institute of technology	Jul 2026
Bachelor of engineering	
New Horizon PU collage	Aug 2022
Pre-university	

 CERTIFICATIONS

Udemy
Mastering Data Structures & Algorithms using C and C++
Udemy
Generative AI for beginners
